IFBF 2026 List of Conference Papers

Print ISBN: 978-1-9162004-6-3

Impact of Activation Methods on Durability of Carbon Felt Electrodes in Organic Flow Batteries

Page 16

Ahmad Alem, Dominik Wickenhauser, Bernhard Marius, Alexa Scheer, Max Rauscher, Johannes Liebhart, Nicole Wechner, Matheus A. Tunes, Michael Feuchter, Christoph Rameshan, Oskar Paris, Stefan Spirk, Christine Bandl

Technical University of Leoben, Austria

Ecolyte GmbH, Austria

Institute of Bioproducts and Paper Technology (BPTI), Graz University of Technology, Austria

Real-time half-cell diagnostics of capacity fade mechanisms in naphthalene diimide-based aqueous organic flow battery

Page 18

Faudillah Alhumairah, Viktor Gueskine, Tobias Abrahamsson, Ivan Hetman, Frida Domeij, Per Leandersson, Xenofon Strakosas, Cedrik Wiberg, Reverant Crispin, Mikhail Vagin

Laboratory of Organic Electronics, Linköping University, Norrköping, Sweden

Wallenberg Wood Science Center, Linköping University, Norrköping, Sweden

Rivus Batteries AB, Göteborg, Sweden

Occupational and Environmental Medicine, Linköping University, Linköping, Sweden

SolidFlow batteries and beyond, scaling lab to pilot and commercial manufacturing

Page 20

John Alper, Ph.D.

CMBlu Energy AG

System-Level Modelling and Experimental Evaluation of a Novel Converterless Hybrid Soluble Lead Flow and Lithium-Ion Battery System

Page 22

Phalguni Anurag, Andrew Cruden, Richard Wills

Department of Mechanical Engineering, University of Southampton, U.K.

Boron-Doped Carbon Felt Electrode on Stabilizing Cycle Life of Soluble Lead Redox Flow Battery

Page 24

Megha Bala, Nandini Jaiswal, Harun Khan and R. Kothandaraman

Clean Energy Lab, Department of Chemistry, Indian Institute of Technology Madras, Chennai, India

The Energy Consortium, IIT Madras, Chennai, India

Mega-Scaling Aqueous Organic FBs Through Modular Electrosynthesis and Repurposing Tank Infrastructure

Page 28
Eugene Beh, Meisam Bahari, Veenasri Vallem, Anuradha Ramachandran, Peter Symons
Quino Energy, Inc., San Leandro, CA, USA
Electrosynthesis Company, Inc., Lancaster, NY, USA

Towards cost efficient production of tubular flow battery stacks
Page 30
Fabian Brandes, Andreas Arlt, Simon Fischer, Antonio Chica, Thorsten Struckmann
Hamburg University of Applied Sciences – Heinrich-Blasius-Institute, Hamburg, Germany
Hamburg University of Applied Sciences – Competence Center for Energy Transition, Hamburg, Germany
Universitat Politècnica de València – Instituto de Tecnología Química, València, Spain
WEVO-CHEMIE GmbH, Ostfildern-Kemnat, Germany
UNIWELL Rohrsysteme GmbH & Co. KG, Ebern, Germany

Cost-effective non-fluorinated composite membranes for vanadium redox flow batteries: a scalable approach for long-duration energy storage
Page 32
Khushbu Butani, Devansh Patel
Tectonic Power Pvt. Ltd., Ahmedabad, Gujarat, India

The Search for a New Posolyte: A Screening Journey of New Moieties for Aqueous Organic Flow Batteries
Page 36
Carlo Caianiello, Darius Pakarinen, Amirreza Khataee, Helena Lundberg
Division of Organic Chemistry, Department of Chemistry, KTH Royal Institute of Technology, Stockholm, Sweden
Division of Applied Electrochemistry, Department of Chemical Engineering, KTH Royal Institute of Technology, Stockholm, Sweden

Integrating Flow Batteries with Supercapacitors: A Strategy to Cut Auxiliaries Consumption
Page 38
Marco Cecchetti, Lorenzo Colturato, Edoardo Gino Macchi
Centre Sustainable Energy, Fondazione Bruno Kessler, Trento, Italy

A Sustainable Membrane–Electrode Assembly for Hydrogen–BQDS Hybrid Flow Batteries: Waste Biomass-Derived Carbon Electrodes and Hydrocarbon-Based Ion-Exchange Membranes
Page 40
Barun Kumar Chakrabarti, Tülay Y. İnan, Andres Parra Puerto, Mustafa Kemal Bayazıt, Reza Afshar Ghotli, Serap Hayat Soytaş, Mahmut Taş, Yashar Hajimolana, Stefan Spirk

Sabanci University Nanotechnology Research and Application Center (SUNUM), Tuzla–Istanbul, Turkey
University of Alicante, Spain
Faculty of Engineering and Natural Science, Sabancı University, Turkey
University of Twente, Netherlands
Graz University of Technology, Austria
Ecolyte GmbH, Graz, Austria

Electrochemical Characterization and Sizing Implications of the Iron/Hydrogen Rebalancing Subsystem for All-Iron Redox Flow Batteries

Page 44
Sai Venkata Akhil Kumar Challuri, Jens Tübke, Jens Noack
Applied Electrochemistry, Fraunhofer Institute for Chemical Technology ICT, Pfinztal, Germany

Electrode Durability and Performance in Electrochemical Vanadium Electrolyte Production

Page 46
Jiří Charvát, Jaromír Pocedič
Pinflow energy storage, s.r.o., Plzeň, Czech republic
New Technologies – Research Centre, University of West Bohemia, Plzeň, Czech Republic

An Electrolyte-Tank Switching Effect for Recycling Waste Electrolytes of a Vanadium Redox Flow Battery

Page 48
Ilhyeon Cho, Shinwoo Lee, Gyungmin Hwang, Joonhyeon Jeon
Department of Advanced Battery Convergence Engineering, Dongguk University-Seoul, Korea
Division of Electronics & Electrical Engineering, Dongguk University-Seoul, Korea

GWh-Scale Vanadium Flow Battery Systems for Data Centres and Critical Infrastructure

Page 50
Jean-Louis Cols, Matt Walz
Invinity Energy Systems, Bathgate, UK / Vancouver, Canada

Project Development and Delivery of a Utility Grade 20.7MWh Vanadium Flow Battery

Page 52
Jean-Louis Cols, Ben Williams, Nicola Watson
Invinity Energy Systems, Bathgate, UK

Time-efficient models for flow fields design in Iron and Vanadium Flow Batteries

Page 54
Mattia Duranti, Niccolò Bonvicin, Marco Cecchetti, Edoardo Gino Macchi
Center for Sustainable Energy, Fondazione Bruno Kessler, Trento, Italy

Preliminary Modelling and analyses of potential opportunities in lithium-ion BESS hybridization
Page 56
Epoupa Mengou J., Cavalca E., Cantoni G., Faifer M., Shehzad A., Mandelli S.
Renewable, New Energies and Material Science Research Center (DE-R&D), Eni TECH - Research & Technological Innovation
Politecnico di Milano, Milano, Italy
Plenitude, Renewables / Engineering & Projects – STORAGE, Milano MI

Vanadium Flow Battery Scaling: Operating a 1 MWh C&I System and Implementing a 20 MWh Project in Korea
Page 60
Jeehyang Huh, Shin Han
H2, Inc., Daejeon, Republic of Korea

A Molecularly Engineered Phenazine Anolyte for Long-Term Stability in Neutral Aqueous Redox Flow Batteries
Page 62
Anu Jacob, Asier Uria, Maider del Gallego, Ainhoa Andres Anasagasti, David Arnaiz Gil, Edgar Ventosa, Eduardo Sánchez-Díez
CIC energiGUNE, Vitoria-Gasteiz, Spain
Universidad de Burgos, Burgos, Spain

Performance Enhancement of VRFB by Coupling Serpentine and Interdigitated Flow Fields
Page 64
Gaurav Jaiswal, Raveendra Gundlapalli
Department of Chemical Engineering, Indian Institute of Technology (BHU)

Reliability in scaling of flow batteries
Page 66
Detlef Jannes, Ming-Jyh Chern
Department of Mechanical Engineering, NTUST, Taipei, Taiwan

An Aqueous Redox Flow Battery using CO2 as an Active Material
Page 68
Ryoichi Kanega, Keito Sawahara, Akihiro Ohira
Research Institute for Energy Efficient Technologies, National Institute of Advanced Industrial Science and Technology, Tsukuba Central, Japan

Suppression of hydrogen evolution reaction by gallium nitrate additive in aqueous all-iron redox flow batteries
Page 70
Changseong Kim, Changseop Kim, Yunsun Kim, Deokhee Yun, Deawon Chung, Joonhyeon Jeon
Department of Advanced Battery Convergence Engineering, Dongguk University-Seoul, Korea

Division of Electronics & Electrical Engineering, Dongguk University-Seoul, Korea

Aqueous redox flow batteries using non-vanadium active materials

Page 72
Yongchai Kwon
Department of Chemical and Biomolecular Engineering, Seoul National University of Science and Technology, Seoul, Republic of Korea

Advancing Redox Flow Stack Technology: Setting New Standards for Sustainable Energy Storage

Page 74
Georg Lieser, Killian Klumpp, Jürgen Haungs
J. Schmalz GmbH, Energy Storage Division, Glatten, Germany

Automated High-Throughput Electrochemical Screening for Redox Flow Batteries

Page 76
Sancia Morris, Christina Roth, Jens Noack
Redox Flow Battery, Applied Electrochemistry, Fraunhofer Institute for Chemical Technologies (ICT), Pfinztal, Germany
Electrochemical Process Engineering, University of Bayreuth, Germany
School of Mechanical and Manufacturing Engineering, University of New South Wales (UNSW), Sydney, Australia
Australian Institute for Bioengineering and Nanotechnology, The University of Queensland (UQ), Brisbane, Australia
Faculty of Electrical Energy Systems and Information Technology (EIT), University of the Bundeswehr München, Neubiberg, Germany

Separating Fe Plating and parasitic HER in all-Iron Flow Batteries by Combining Experiment and Theory

Page 80
Alena Neudert, Steffen Zappe, Fridolin Röder, Christina Roth
Chair of Electrochemical Process Engineering, University of Bayreuth, Bayreuth, Germany
Bavarian Center for Battery Technology (BayBatt), University of Bayreuth, Bayreuth, Germany

Development of a new Vanadium Flow Battery

Page 82
Yuta Ochi, Takashi Kanno, Arata Doi
Redox Flow Battery System Division, Sumitomo Electric Industries, Ltd, Osaka, Japan

Vanadium market supply and demand

Page 84
Terry Perles
President, TTP Squared, LLC, Pittsburgh, USA

Recommended Screening Process to Assess the Viability of New Flow-Battery Membranes
Page 88
Mike L. Perry and N. Harsha Attanayake
Storion Energy, Alpharetta, GA and Wilmington, MA, USA

High-Performance Vanadium Flow Battery (VFB) Stacks Enable Long-Duration Energy Storage Systems with Ultra-Fast Response Times for Critical Applications
Page 90
Mike L. Perry, Timothy Lund, Mike Falcinelli, and Travis Torrey
Storion Energy, Alpharetta, GA and Wilmington, MA, USA

Electrolyte at scale: supplying AI datacentres and competing beyond Chinese dominance
Page 92
Jeremy Peters
Energy Storage, Vecco Group, Brisbane, Australia

Inside a VFB: investigating real-time materials ageing
Page 94
Alasdair Robertson, Rupak Banerjee
Invinity Energy Systems, Bathgate, UK

Current status and outlook of the 2 MW / 20 MWh vanadium redox-flow-battery at Fraunhofer ICT
Page 96
Yannick Seiler, Michael Schäffer, Jens Tübke and Jens Noack
Department of Chemical Engineering, Karlsruher Institute of Technology, Karlsruhe, Germany
Department of Applied Electrochemistry, Fraunhofer Institute of Chemical Technologies, Pfinztal, Germany
Department of Mechanical and Manufacturing Engineering, University of New South Wales (UNSW), Sydney, Australia
Australian Institute for Bioengineering and Nanotechnology, The University of Queensland (UQ), Brisbane, Australia
Department of Electrical Energy Systems and Information Technology (EIT), University of the Bundeswehr, Munich, Germany

Design and Validation of a Modular Stack Pack for Flow Batteries
Page 98
Damian Pandel, Tobias Kappels, Hamid Sebbaq, Philipp Schröder, Khalid Zergoun, Thorsten Seipp
Volterion GmbH & Co. KG, Dortmund, Germany

Bridging the Gap Between Academia and Industry: Scalable Hydrocarbon Ionomers for Next-Generation Flow Batteries
Page 100
Scott E. Watkins

Kyung-In Synthetic Corporation (KISCO), Seoul, Republic of Korea

Insights into Crossover in Membrane Separators for Flow Batteries
Page 102
Douglas I. Kushner, Ahmet Kusoglu, Andrew M. Herring, and Adam Z. Weber
Energy Technologies Area, Lawrence Berkeley National Laboratory, Berkeley, CA, USA
Department of Chemical Engineering, Colorado School of Mines, Golden, CO, USA

Effect of serinol as a hydrophilic organic additive for improving interfacial property and redox kinetics in VRFB positive electrolyte
Page 104
Deokhee Yun, Changseop Kim, Gyungmin Hwang, Joonhyeon Jeon
Division of Electronics & Electrical Engineering, Dongguk University-Seoul, Korea
Department of Advanced Battery Convergence Engineering, Dongguk University-Seoul, Korea

From materials to systems: Independent innovation throughout the entire chain of high-performance and low-cost VFB
Page 106
Yin Zhang, JiaChen Hu, Xin Cao, Tao Fang, Anhui Zhou, Yanwei Diao, Shuaizhou Liu
Wontai Power, Shanghai, China

Large Flow Battery applications for Long Duration and AI Data Centers. The new segment between lithium and Hydrogen
Page 108
Antonio Zingales
SAET Spa, Padova, Italy
